

# Right Guide

This column is designed to give official VA answers to veterans' readjustment problems. Send questions to Right Guide, 1031 South Broadway, Los Angeles 15.

General Bradley said: "Veterans should be counseled and advised, particularly with reference to negotiating or entering into contract requiring the payment of deposits or earnest money or incurring obligations prior to applying for a loan to be guaranteed or insured, UNLESS THE CONTRACT PROVIDES THAT HE WILL NOT LOSE HIS MONEY IF THE LOAN PROVES TO BE INELIGIBLE."

"Veterans also should be advised that they will have available to them the loan benefits for a period of ten years after the official end of this World War II. Their attention should be called to the extraordinary lack of supplies that exists today and the abnormally high prices that prevail for homes, farms, equipment and other commodities. Their attention should be directed to the fact that MANY ARE TRYING TO BUY AND VERY FEW ARE ANXIOUS TO SELL; also the possibility of being able to purchase to better advantage in the succeeding years and the probability of loss in resale."

Question: The following question from a Long Beach customer is typical of those asked every week:

"We're going to buy a home under the GI Bill. Buying a home is a serious thing with us and we don't want to make any mistakes if we can help it. We want to make the best and the safest deal we can. What is your advice?"

Answer: You have started in the right direction already, by asking questions. A safe deal can stand a lot of questions; a poor deal cannot.

There are safe deals to be made. More than 125 loans are made to veterans by Southern California lenders every day. Select a bank or other authorized lender and ask about your deal. Most of these lenders have carefully selected veteran advisers thoroughly indoctrinated by experience and training to counsel and advise you.

It is the advice of the Veterans Administration — and good common sense — to see your lender before you sign any contract. Home loan business has grown enormously and with this growth some racketeers have sprung up. Racket operators are shrewd and work within the law. On the other hand, there are many reliable agents, contractors, brokers, etc., doing a dependable job for home-seeking veterans. A good agent will not object if you ask the bank or Better Business Bureau about him. A racket operator will.

## Sheriff's Aero Squad Cites Low Flying Pilots

Two men arrested Sunday for low flying above crowded beaches were arraigned Monday on charges of violating the Air Navigation Act. Jake Marshall Hopwood, 33, Los Angeles, was charged with flying his plane at 250 feet over the breaker line between Hermosa Beach and Santa Monica to which he pleaded guilty before Judge Frank Carrell in Gardena Justice Court. The judge suspended the sentence and placed Hopwood on probation for six months on condition that he forego flying for 30 days and pay a \$100 fine.

La Verne Riley, 27, Santa Monica, was arraigned before Municipal Judge Orlando Rhodes in the beach city on a charge of "buzzing" the Malibu Beach area. He was released under \$100 bond and ordered to appear at a later date for plea.

Both pilots were cited by Lt. Sewell Griggers of the Sheriff's aero squad.
